uniTF

CYBERSECURITY MANAGEMENT PLATFORM

Single pane of glass for efficient cybersecurity operations

Accurate telemetry data collection and smart processing for superior threat detection and response

Beyond SIEM, UEBA and XDR

uniTF

CONCEPT

SIEM solutions are built on the idea of finding a needle in a haystack. In reality, these solutions are coping with that task producing vast amount of noise consuming different telemetry data. UniTF focuses on accurate collection of right and actionable input data (only the right input can produce the right output). The precisely picked data is enriched with contextual information and threat intelligence and "smartly" processed in different layers - logs, signals and incidents. The concept of signals allows to have just the right amount of actionable information for further efficient processing, threat detection and analysis. The signals also enable great visibility and a single pane of glass view of the entire system drilling down to users, entities and their respective sessions.

UniTF combines signals, rules, and UEBA session scores to pinpoint the threats. The rules can be deterministic applying threat intelligence as IOC and powerful TTPs or analytical, which includes anomaly detection and machine learning.

UniTF integrates with different solutions to enable swift containment and effective response.
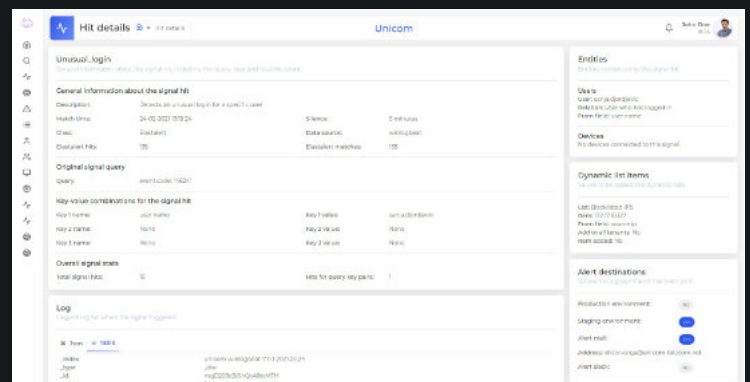

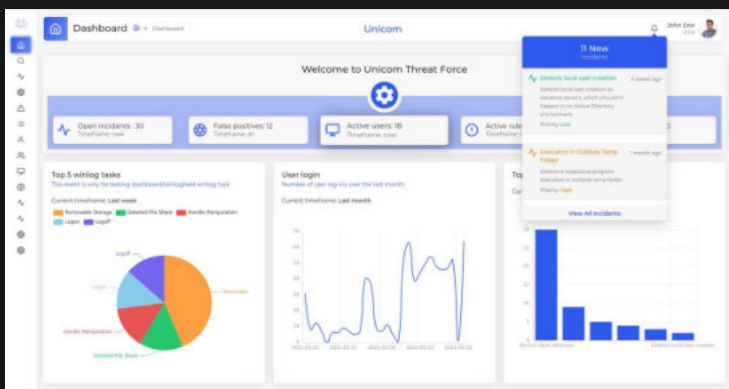

FEATURES

▷ Accurate and performant data ingest

▷ Real-world threats focused detection

▷ Layered concept: logs, signals, incidents

▷ Data lake for custom analytics

▷ Comprehensive UI

▷ UEBA approach

▷ User and entity sessions drill-down

▷ Reporting

▷ Cloud integrations

▷ MITRE ATT&CK Mapping

▷ Compliance Mapping

▷ Response automation

▷ Own network and endpoint sensors

▷ Flexible Licensing Models

▷ SaaS or On-premise

▷ Multi-tenancy - ideal for MSSPs for MDR

About Unicom

Unicom is a group of companies, focused on system integration, software development, cloud cybersecurity services and IT distribution, nurturing a culture of innovation and people development. The main customer segments of the company are telco, government, finance and corporate sectors. The strongest expertise is on cybersecurity, network and IT infrastructure, analytics solutions and product development. The IP portfolio includes: UniTF Cybersecurity Management Platform (SIEM & UEBA), Mobile device and parental control solution, Carrier-grade lawful session tracking, Consent and privacy management. Unicom operates a CERT and Security Operation Center and provides cloud based and operational security services.
